Antonovich and Rorie Skei - Santa Monica Mountains Conservancy.

Dear Ms. Foord,

Thank you for your diligent efforts in protecting COSCA open space to the highest of standards. With an area so protected and un-impacted by man in the last 50 years, your property fell into a much sought after category. The Environmental Protection Agency (EPA region 9) and the Department of Toxic Substances Control (DTSC) are currently searching for "Background" or areas that would be considered un-impacted by activities related to the Santa Susana Field Laboratory (SSFL). The Regulatory Agencies that are here to protect Human Health and the Environment need permission of your Board for access. In addition, a recommendation from COSCA to the City of Thousand Oaks, regarding Regulatory Agency access to their adjacent parcel that you oversee would allow this study to be completed properly. With President Obama's \$41.5 million dollars in Stimulus money awarded to the Department of Energy for the SSFL specifically, you will have played a part in the nations recovery and jump-started a long awaited cleanup.

Thank you in advance for your time,

If there are any questions please call...310-428-5085
