Dear Ms. Callery,

This is a request that DTSC provide an update on the Voluntary Cleanup Agreement (VCA) that the City of Los Angeles Department of Recreation entered into on September 5th of 2008 regarding the currently Closed Los Angeles City Park known as Chatsworth Park South. We are concerned about Trichloroethylene (TCE) and other Aerospace toxins that could be drawn towards this area from the daily 4300 gallons pumped out of the Southern California Rail Authority Chatsworth Tunnel No. 26 for flood controlling purposes draining into the Los Angeles River via Santa Susana Creek.

http://www.cleanuprocketdyne.org/documents/curo_eir/Chatsworth%20Groundwater%20to%20surface.pdf

The past documentation has not looked for TCE and we hereby request that this be done.

Thank you in advance for all your work on these issues and keeping us informed on associated correspondence and request you continue to do so.
