Dear Ms. Egoscue and Mr. Bacharowski,

Yesterday was the deadline for the Report of Wastewater Discharge (ROWD) and supporting documents as specified in the California Regional Water Quality Control Board, Los Angeles Region (RWQCB) Order dated November 19th of 2008 regarding the effluent from the Chatsworth Train Tunnel No. 26 that drains into the currently Closed Los Angeles City Park known as Chatsworth Park South and from there in the L.A. River.

http://www.acmela.org/images/Train_Tunnel_26_Located_in_Ventura_Subdivision_Requiment_to_submit_report_File_08-156_2008-11-19.pdf

Please forward any correspondence between the RWQCB and the Southern California Rail Authority or any other entity that would oversee the operations of Chatsworth Train Tunnel No. 26 including any test results to ACME (Aerospace Cancer Museum of Education) and the interested parties on the cc list.

We are concerned about Trichloroethylene (TCE) and other Aerospace toxins that could be drawn towards this area from the daily 4300 gallons pumped out of this tunnel for

flood controlling purposes.
