cc. Eric Evans – HydroGeoLogic, Inc. (HGL)

7/2/2009

Dear Nicole and Eric,

Below you will find ACME's comments on the Draft Revision 1 Sampling Analysis Plan and Field Sampling Plan Radiological Background Study Santa Susana Field Laboratory issued in June 2009 by HydroGeoLogic, Inc. (HGL).

In the Map Section Figure 1.4 the Legend should read Lang Ranch, not Bridal Path.  
In the Map Section Figure 1.5 the Legend should read Rocky Peak, not Bridal Path.  
In Section 2.1, Site Location and Description, Brandeis-Bardin Institute is now the American Jewish University's Brandeis-Bardin Campus.  
In Section 2.3.1 SSFL Property Ownership, take out "Rocketdyne merged with Atomics International" it should read "Rocketdyne merged with ESG (Energy Systems Group), which was comprised of Atomics International and the Energy Technology Engineering Center (ETEC)." This will introduce ETEC for a better understanding of Section 2.3.2 as they talk about ETEC with no introduction.  
In Section 2.3.3 Radiological Activities, the McLaren/Hart report should read 1993 and make the change in Section 4.0 the REFERENCE Section as it has the same McLaren/Hart error. This section also should clarify that the SRE had a power excursion on July 13<sup>th</sup>, 1959 and they operated it intermittently until July 26<sup>th</sup>, 1959 to inspect the reactor core.

If there are any questions please call...818-712-6903
