

You are invited
to attend the
**Santa Susana
Field Laboratory
Interagency
Workgroup Meeting**

Thursday, September 8th, 2011

6:30 p.m. - 10:00 p.m.

Simi Valley Cultural Arts Center – Main Stage Theatre
3050 Los Angeles Avenue • Simi Valley, CA 93065

For over 20 years, the SSFL Interagency Workgroup has provided a quarterly forum where government agencies share information and update the community about the status of the cleanup efforts at the Santa Susana Field Laboratory. The meeting includes an opportunity for community members to pose questions and offer comments on the topics presented at each meeting. All members of the general public are invited to attend.

The agenda for the September 8th meeting will include updates on:

○ **EPA's Radiological Background Study and Gamma Scanning Results.**

You will learn about the results of the **Environmental Protection Agency's** (EPA) Radiological Background Study which will be used as the basis to determine where residual radiological soil contamination still remains at the portion of the SSFL where the former nuclear reactors once operated (aka, SSFL Area IV). Also, EPA will present its Gamma Scanning results around the old Sodium Reactor Experiment (SRE) complex.

○ **Chemical Testing Results in Area IV.**

The State of California Department of Toxic Substances Control (DTSC) and the **Department of Energy** (DOE) will present initial test results for chemical contamination and will also present all the clearly contaminated zones identified so far in SSFL Area IV.

○ **DTSC Update on Activities in Area I, II, and III.**

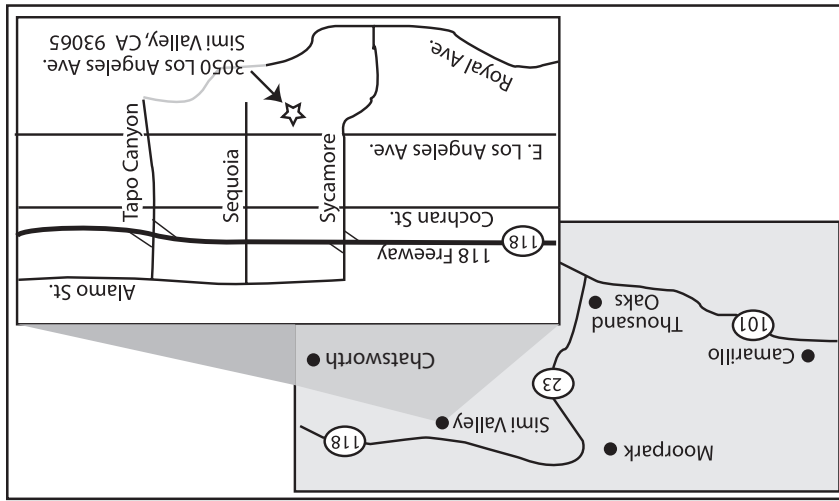

DTSC will provide an update regarding site cleanup activities by **NASA** and **Boeing** in Areas I, II, and III.
